Note: Toyota used a larger glass in 1984 and some 1985 models, which was discontinued because of breakage problems. Toyota then changed to a smaller size glass for most 1985 models. Our HD300 glass is the smaller size, and measures 41" x 12 5/8". If your customer's Celica has the old, larger size glass, you need to order both the 3000 Top and HD300 Glass Window, to avoid problems with the top not covering the heatsealed edges of the glass window.

3001	1987-89	Toyota Celica Top Only. Original style plastic extrusion snaps into rear bow. NO Glass Window available. For Headliner, see 931L below.		8.0	8
